An Introduction to

fedora

What is Fedora?

- **Fedora is Linux-based Operating that showcases the latest in free and Open Source Software.**
- **Fedora is always free for anyone to use, modify, and distribute.**
- **It is built by people across the globe who work together as a community: the Fedora Project.**
- **Built over 70 distributions.**

What is Fedora?

Free from legally encumbered software.

In line with Red Hat patent promise to not use any patents against Free and Open-Source developers.

What is Fedora today?

[Fedora | RHEL]

don't sell it | sell it

6 month release | 18 month release

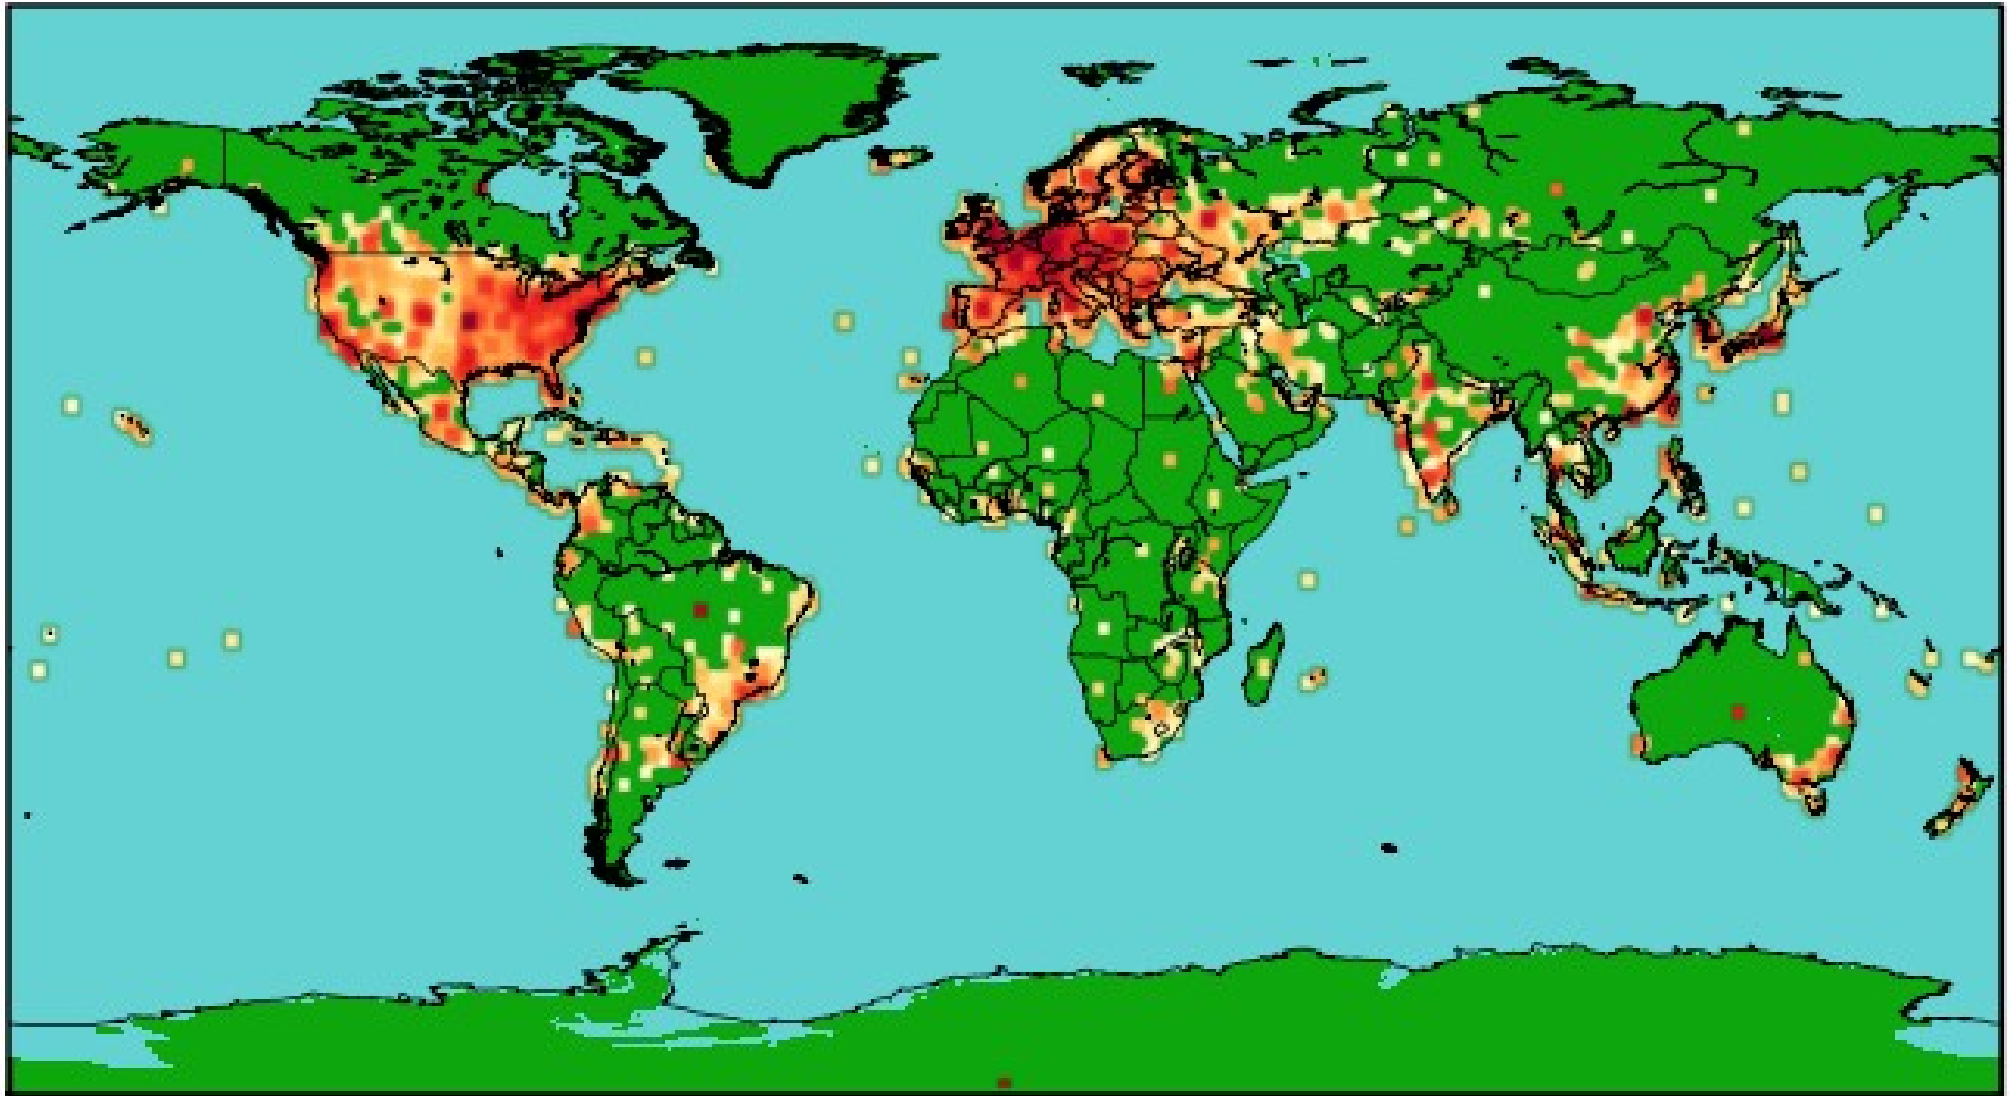

no paid support | 5 year minimum support

new cool stuff | old boring stuff

community driven | **company driven**

[320,000 Fedora boxes checked in for updates in 1 month]

Why does Fedora
matter?

[A lab for open source development]

lab rules:

If you do it, do it in public.

Make it new, but make it work.

Fail, learn, and repeat.

As quickly as possible!

[First you play]

Get Fedora for free.

Poke it, prod it, use it, share it.

Be curious.

Hey Timon!! I installed Fedora & it uninstalled Windows

then I m not goin' to install it on my pc....

Lets ask Rafiqui, he must
have a solution

What the heck!! we
gonna ask that
monkey!!!!

Rafiqui i installed fedora & it took away my windows data .

Listen pumba!! u installed it in the same drive in which windows was present !! So do it 1 more time & with the 3-d cool feauters u can't resist it!!

timon!! fedora doesn't
have problems of virus
infections too.
Y don't u install it..

Oops!! i gotta need
an antivirus

U know about its
openoffice,musicplayer,desktop
features.
U've even 4 workspaces to work
on i.e. No traffic of multiple tabs.

So if we can work on it
Y can't u!!!!
